

Vaccinations for Heart Patients

**Protect Your Heart.
Get Vaccinated.**

Why Vaccines Are Important for Cardiovascular Patients!

If you live with heart disease, your immune system may be weaker, and infections can lead to serious complications. Vaccines help protect you from these preventable illnesses, reduce the risk of severe outcomes, and keep your heart healthier.

Take Action

*Talk to your doctor today about
which vaccines you need to stay
healthy and protect your heart from
preventable diseases.*
